

Resistance To Chemicals

Polyflor Standard XL

DATE: APRIL 2005

Resistance to chemicals is tested over a 24 hour contact period at room temperature of 21°C, followed by rinsing with cold water. Polyflor believes this simulates the worst situation where spillages are not removed immediately and are only cleaned by normal maintenance.

Key

U - Appearance unchanged

A - Slight stain

B - Moderate stain

C - Heavy stain

E - Appearance unchanged but slight surface disturbance
