## Llwynocrwn Primary School Beddau, UK

**PRODUCTS USED:**  
Forest fx PUR, Polysafe Verona PUR

High performance commercial vinyl flooring from Polyflor was recently installed at Llwynocrwn Primary School in Beddau, Wales to create a brand new junior block at the school building.

Cardiff based flooring contractors CS Flooring Solutions fitted around 600m<sup>2</sup> of Polyflor vinyl flooring throughout the new school building as part of Rhondda Cynon Taf Council's £4 million refurbishment project. Led by main contractors Morgan Sindall, the new extension is a sustainable 7 classroom building attached to the recently built infant school.

Wood effect vinyl flooring from Polyflor's Forest fx PUR range in the Classic Oak design was installed in the school hall and meeting rooms, whilst high design Polysafe Verona PUR safety flooring in the light blue Skyline shade was selected for the classrooms, cloakroom, kitchen, and toilets.

Ross Williams, Project Manager at Morgan Sindall commented, "With the installation of Polyflor's vinyl flooring, we've successfully created a sustainable, practical, safe and modern learning environment for the pupils and staff at Llwynocrwn Primary School to enjoy. We're delighted with the finished look of the flooring in these areas and are confident that it will continue to perform for years to come."
