

SET-IN COVERED SKIRTING

Skirting of this type is fitted before the flooring is laid, where a simple butt joint is required. Welded to the flooring, this provides a secure and impermeable joint. The benefits of a sealed, easily maintained surface are invaluable in hospitals and other similar locations where hygiene is of paramount importance.

MC18 Available in 2 metre lengths.
15 colours.

MC18c 20 metre length coil.
15 colours.
