

# POLYSAFE FOR WET ROOMS WITH PUR

## MAINTENANCE REGIME

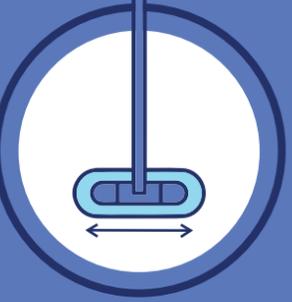

OR

**1** Remove all loose debris.  
 > Sweep or vacuum to remove dust and grit.  
 > Spot scrub regularly with a deck brush.

**2** Apply a solution of alkaline cleanser to the floor  
 > Diluted to the manufacturer's instructions and leave for sufficient time to react with the soiling.

**3** Pick up the solution with a clean microfibre mop, using a continuous side-to-side motion.  
 > Launder the dirty mop heads in preparation for reuse.

**4** Rinse the floor thoroughly with clean warm water  
 > Pick up with a wet vacuum and leave to dry thoroughly.

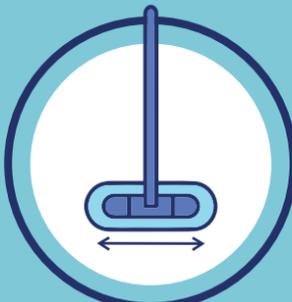

OR OR

**1** Sweep, mop sweep or dry vacuum the floor, to remove dust and loose dirt.  
 > Using a scrubbing brush or a cylindrical type scrubbing machine.

**2** Apply a solution of diluted neutral or alkaline cleanser to the floor and leave for sufficient time to react with the soiling.  
 > Pick up the solution with a clean microfibre mop, using a continuous side-to-side motion.

**3** Launder the dirty mop heads in preparation for reuse.

**4** Rinse the floor thoroughly with clean warm water.  
 > Pick up with a wet vacuum and leave to dry thoroughly.

> For heavy soiling  
 Use a 165 rpm rotary scrubbing machine, deck scrubber or mop and bucket system with the appropriate neutral or alkaline cleanser.

> Always follow the Health and Safety guidance provided.  
 > Maintainers, polishes or floor dressings containing polish should never be applied to Polysafe PUR ranges, as this may impair slip resistance.  
 > Cleaners and detergents should be diluted to the manufacturer's instructions and left for sufficient time to react with the soiling.  
 > A twister or any other abrasive pad containing diamond shreds should not be used on any Polysafe ranges under any circumstances.
