

# POLYSAFE WITH PUR

## MAINTENANCE REGIME

OR

**1** Remove all loose debris.  
> Sweep or vacuum to remove dust and grit.

**2** Apply a solution of neutral cleanser with a spray.  
> Leave for sufficient time to react with the soiling.

**3** Pick up the solution with a clean microfiber mop, using a continuous side-to-side motion.  
> Rinse the floor thoroughly with clean warm water and leave to dry thoroughly.

**4** Launder the dirty mop heads in preparation for reuse.

OR

**1** Remove all loose debris.  
> Sweep or vacuum to remove dust and grit.

**2** Apply a solution of neutral cleanser with a spray.  
> Leave for sufficient time to react with the soiling.

**3** Pick up the solution with a clean microfiber mop, using a continuous side-to-side motion.  
> Launder the dirty mop heads in preparation for reuse.

**4** Rinse the floor thoroughly with clean warm water  
> Pick up with a wet vacuum and leave to dry thoroughly.

OR

**1** Remove all loose debris.  
> Sweep or vacuum to remove dust and grit.

**2** Using a 165 rpm rotary machine with a 3M red or green pad, scrub the floor and pick up the slurry with a wet vacuum.

- > Always follow the Health and Safety guidance provided.
- > Maintainers, polishes or floor dressings containing polish should never be applied to Polysafe PUR ranges, as this may impair slip resistance.
- > Polysafe safety flooring ranges are compatible for use with the most commonly used alco-based hand gels and are suitable for steam cleaning on a periodic basis.
- > Cleaners and detergents should be diluted to the manufacturer's instructions and left for sufficient time to react with the soiling.
- > A twister or any other abrasive pad containing diamond shreds should not be used on any Polysafe ranges under any circumstances.
- > Use a neutral and/or alkaline cleaner dependent on soiling.
