

The **Polyflor** Design Service  
*Completing the picture*

# Who we are...

The flooring is a major part of any building and we can help you create the perfect flooring design to enhance any environment.

Polyflor has over 20 years experience in delivering floor design solutions. From simple tile patterns, through borders and compass designs, to custom cut motifs large and small, Polyflor delivers!

Almost any area within a building can have a design applied to the flooring and we have many examples within the healthcare, education, retail and residential sectors.

**Creative thinking**  
**Accuracy**  
**Dedication**  
**Delivery**

*We apply this logic to  
what we do.  
Any scale,  
same accuracy.*

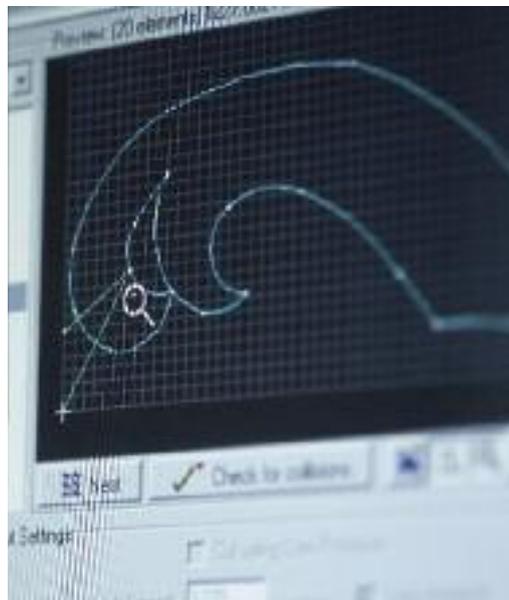

# Who we are...

*The design service is here for you*

From the first seed of an idea to finished design, if you have a concept for a floor, we can help. We've helped architects and designers to realise stunning floors for hundreds of buildings.

We can provide support throughout the project. Our designers can provide visuals and advise colours and product choices, from simple colour suggestions to themed design layouts to fit with the overall schemes.

It's your opportunity to create exciting, stimulating and memorable floor designs.

# What we do...

## *We can work from almost anything*

You imagine it, we'll deliver it. There's virtually no limit to the shapes, patterns or pictures you can create with the help of the Polyflor Design Service. We offer the precision and the flexibility of waterjet cutting, using a high-pressure stream of water 0.1mm thick to produce any design you require. School badges, information signs, corporate motifs and children's designs, the possibilities are endless.

*You imagine it, we'll deliver it*

*The floor in my exhibition looked absolutely wonderful and was very much admired. I felt that without it, it would have been only half as successful.*

Wendy Ramshaw OBE

# How we do it...

## Case study - Derby City Hospital

Cheery seagulls, giant starfish, seahorses, dolphins and colourful circular waves are among the seaside themed designs inset into the flooring at the new emergency department for children at the Derby City General Hospital.

Colourful murals and pieces of artwork depicting sunny seaside holiday scenes further introduce an element of fun and distraction to the unit that was at the heart of the project.

This was led by Jane Montague, interior designer from the Derby based architectural practice, Matthew Montague Architects, who were commissioned by Derby Hospitals NHS Foundation Trust to enhance the newly-built children's emergency department.

Working with Jane and her design team, a computerised flooring design was created by the Polyflor Design Service to interpret the shapes and dimensions of every element of the designs, transforming them into a precise flooring 'jigsaw' for ease of installation.

Shades from Polyflor XL PU and Mystique PUR were specified for this installation. Both ranges offer attractive colourways and meet the strict performance requirements demanded by today's modern healthcare facilities.

We aimed to make the visiting experience more relaxed and friendly, so after working alongside a team from the hospital, focus groups were held with teenagers and younger children to ascertain their views and ideas.

This resulted in a seaside theme using uplifting pastel colours and the colour choices available from Polyflor provided a perfect complement to the contemporary theme used throughout the whole scheme.

Jane Montague, Matthew Montague Architects

# How we do it...

*You imagine it, we'll deliver it*

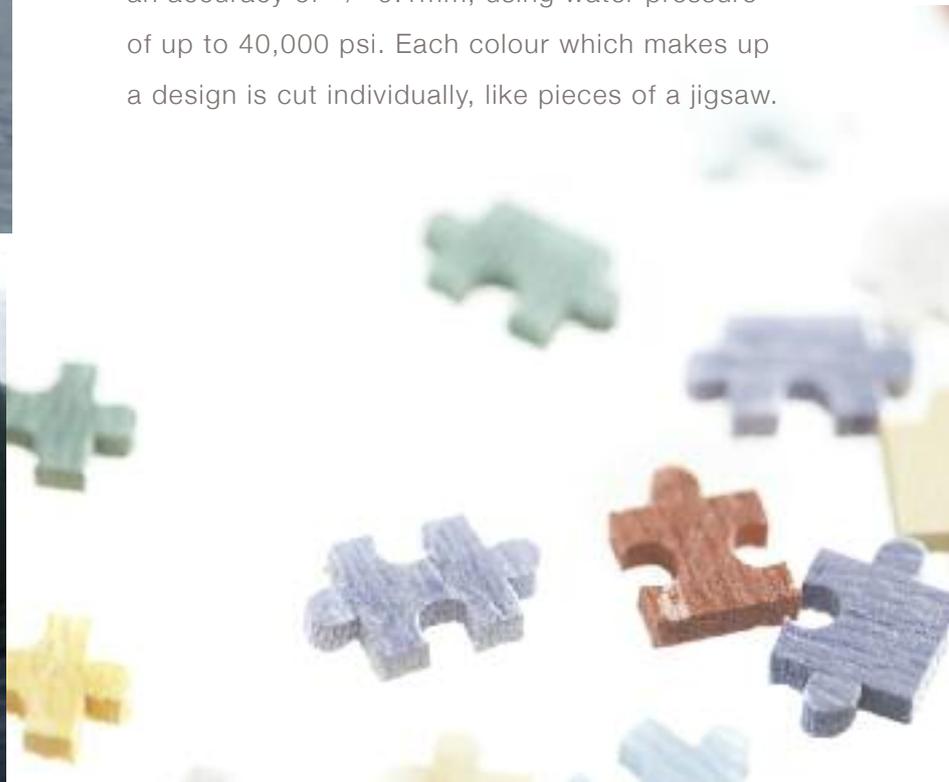

1) We can work from almost anything. If you already have an idea of the design you want, send it to us. We can accept anything from a sketch on a notepad, to a fully dimensioned CAD drawing. Ideally we would prefer a jpeg type image but we can handle most file formats.

2) We use up to the minute CAD software together with a sophisticated graphics package. When a design is ordered, we can create a detailed flooring design ready for approval or amendment.

3) Next, we create a cutting program for your design. Polyflor use high precision waterjet cutting machines to cut your designs. Using custom built software, our cutting tables cut to an accuracy of +/- 0.1mm, using water pressure of up to 40,000 psi. Each colour which makes up a design is cut individually, like pieces of a jigsaw.

We can accept most graphics file formats typically in use. The better the quality of drawing supplied, the more accurately we can re-create your design. If you want to send us a CAD drawing, we prefer DXF or Autocad DWG file formats.

# How we do it...

*Attention to detail with a hands-on approach*

Craftsmanship is all about care and attention and we acknowledge this throughout the creative process, from initial drawing stage through to delivery to site. As the design is cut, the various parts of the 'jigsaw' are checked and carefully aligned. A special surface tape is applied to hold the design together before packing and delivery. A large design may come in several sections. For bigger designs we label all parts and include drawings to make assembly as simple as possible.

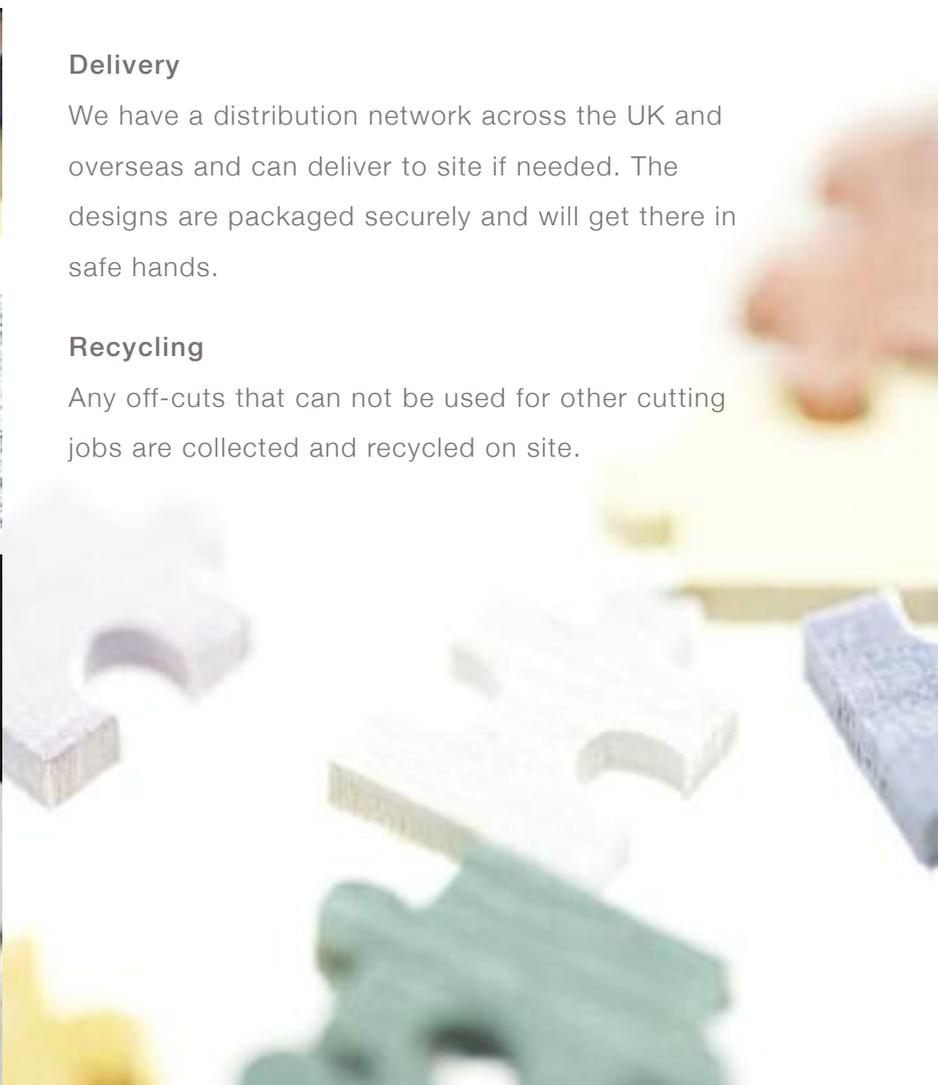

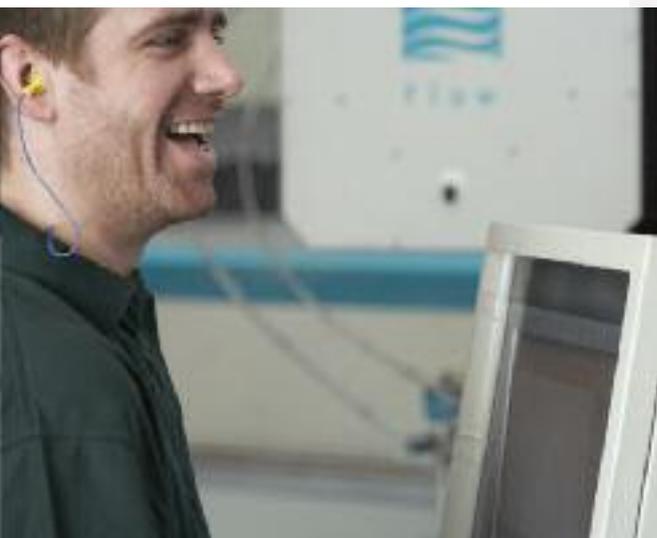

## **Delivery**

We have a distribution network across the UK and overseas and can deliver to site if needed. The designs are packaged securely and will get there in safe hands.

## **Recycling**

Any off-cuts that can not be used for other cutting jobs are collected and recycled on site.

# Where we are...

*Experts in education*

The creation of a stimulating and fun environment can be achieved through the effective use of design and colour.

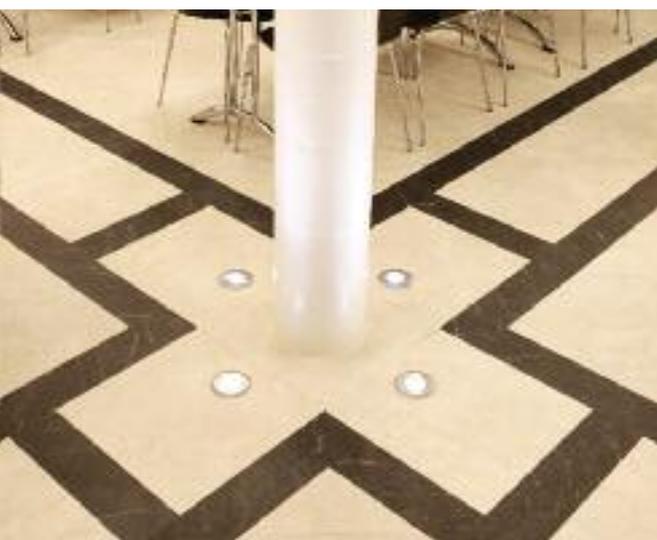

As a leading flooring supplier to the education sector, Polyflor provides a wide variety of shades and decorations to transform any education facility. School logos and crests, often sited in entrance areas, provide a highly colourful and warm welcome to visitors and pupils.

Clear information signs and department locators can be incorporated into floor schemes to help navigate around a school or to personalise a space. When developing a flooring concept, the Polyflor Design Service helps you to create a precision-cut, easy to install floor design to transform any learning space.

## **Designed with style**

High-design and hardwearing flooring options are available through the use of highly realistic wood, stone, metallic and abstract designs – combined with the use of accessories such as borders, corners and feature strips.

*School badges and emblems*

*Our designs can be sealed with a polish and are ideal for corridor and reception areas.*

*The Radclyffe School, Polysafe Standard with Polyflor Standard XL motif*

# Where we are...

## *Experts in healthcare*

Design and colour contribute positively to the comfort and welfare of the patient by creating light, bright and airy spaces.

Polyflor possesses a broad palette of contemporary colours as well as stone, marble and wood effect designs, giving the specifier the opportunity to create bespoke schemes with a distinct non-clinical feel.

Additional features can include complementary or contrast borders with inlaid designs and wood effect finishes for a highly realistic replication of natural materials.

Information signs, safety notices and department locators can be incorporated to assist visitors with wayfinding.

Let the Polyflor Design Service help you to create a striking floor design that will transform any healthcare facility.

### **Hygiene critical areas**

To encourage hygiene compliance, alco-based hand gels are often sited where there are no handwashing facilities. Highly visible logos inset into the floor are used as part of infection control measures and are available as templates.

# Where we are...

*Experts in retail and leisure*

Interior design within the retail and leisure sectors is of huge importance and the branding, merchandising and performance of the floor is critical. We can easily create company logos, unique compositions and distinctive zonal areas within the floor, meeting and exceeding customer demands along the way.

Through our offer of floor design accessories and the use of the waterjet and guillotine cutting service, we provide an extensive palette of product and design features to create a highly stimulating environment.

## *Experts in residential flooring*

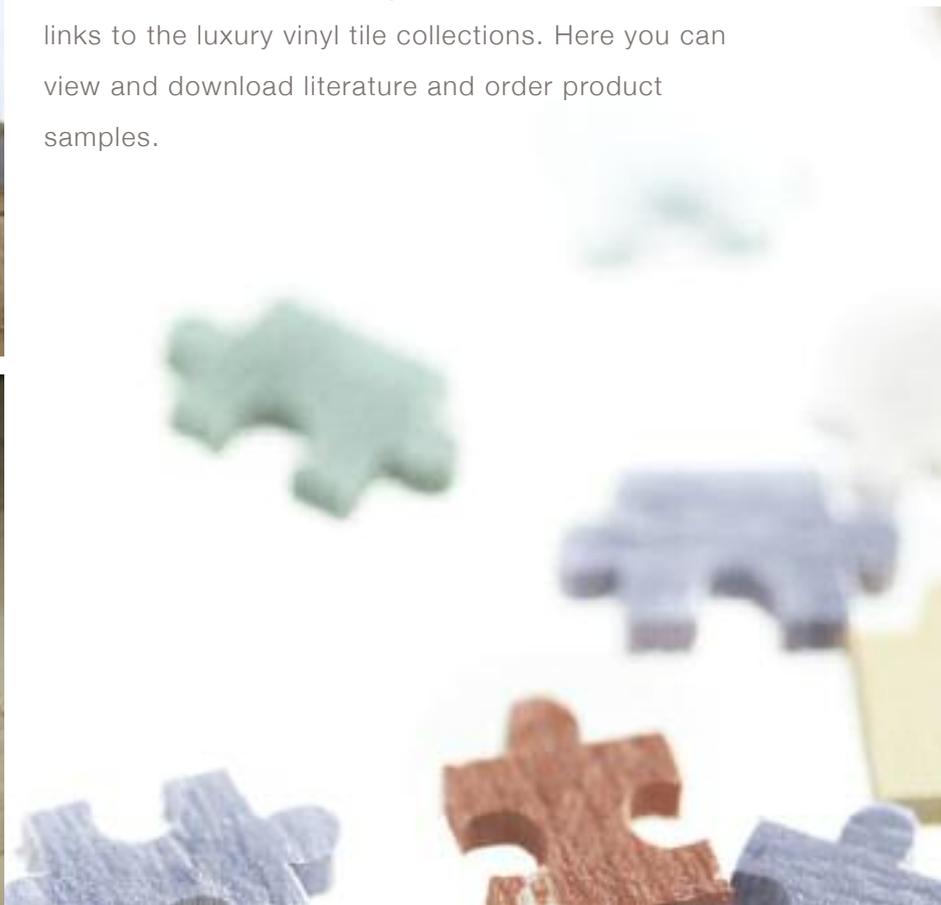

The interior decoration of the home environment is a personal and individual choice. The Polyflor collection of luxury vinyl tiles is designed to meet these requirements and to offer a high-design, authentic, creative and practical solution which will look great for many years.

The tiles and planks from these collections are ideal for use with the cutting service as they allow individual and bespoke designs to come to life. Inlaid in conjunction with realistic design strips and highlight or perimeter features, the possibilities offer a wide scope for creativity.

For further details visit [polyflor.com](http://polyflor.com) and follow the links to the luxury vinyl tile collections. Here you can view and download literature and order product samples.

# What you do...

**Choose from our standard designs, motifs and borders or contact us with your ideas**

We offer attractive, made to order standard borders, floor designs and feature motifs that add that something special to your project.

Visit **Polyflor.com** and click on the **Design Service** option to view our library of designs and examples of work. If you can't find anything that fits your brief, contact our Design Service team directly to discuss your needs.

## Standard designs

### Children's motifs

From seaside to circus, our children's themed motifs are used in schools, children's hospital wards and play centres to create a bright, child orientated environment.

### Design floors

From inlaid compass designs to attractive border patterns and must-have floor designs, prepare to be inspired by our selection of design floors.

### Information signs

We offer information signs and wayfinding designs ideal for large public spaces, such as hospitals and schools, as well as commercial spaces.

### Logos

Whatever the colour or shape, we will work with you to make sure your corporate branding makes a big statement.

### Bespoke designs

We will turn your existing design into reality or work with you to create a bespoke floor that grabs attention.
