## Lobe Head Offices Quebec City, Canada

**PRODUCTS USED:**  
**Expona Flow**

Architecture firm Eric Painchaud Architecte et Associes Inc were contracted to manage the design and build of the new Lobe Head Offices in Quebec City. The Lobe Network of Clinics have been created with all the health, hearing, language and speech professionals gathered under the same roof with over 25 years of experience in hearing health and communication. Polyflor Expona Flow PUR was selected in Dark Industrial Concrete and Dark Grey Concrete for the Offices, Meeting Rooms and Reception Areas.

Featuring contemporary concrete designs and intricate detailing for extra authenticity, Expona Flow PUR was chosen because it was ideal for the high traffic office environment of the Lobe Head Offices with the heavy commercial use classification of the product. Expona Flow features a high quality, cross-linked polyurethane reinforcement (PUR) providing a low cost, polish-free maintenance regime and the finish of the vinyl gives the desired comfort and acoustics and allows you to easily add colour inserts to personalise and make spaces unique. The durability of Expona Flow lends itself perfectly to the demands of commercial interiors, leading with the key advantages of aesthetics and performance, with the added flexibility to meet corporate design schemes

Sandra Corneau from Eric Painchaud Architecte et Associes Inc commented, 'We are very satisfied with the results and Expona Flow has met our expectations and that of the customers. It was good value for money and we were able to achieve a brilliant contemporary look with the concrete finishes provided.'
