

# NATIONAL LIDO OF WALES

---

## CASE STUDY

# LIDO PONTY

LIDO CENEDLAETHOL CYMRU | NATIONAL LIDO OF WALES

**Country:**  
Wales,  
United Kingdom

Polysafe flooring ranges were recently used to help return Lido Ponty, the National Lido of Wales in Pontypridd, to its former glory as part of Rhondda Cynon Taf Council's GBP 6.3 million restoration project.

**Market Segment:**  
Hospitality & Leisure

Lido Ponty is a Grade II listed lido, originally built in 1927, which has now been transformed into a modern outdoor pool and adventure play park by general contractors Kier Construction. The Polysafe Modena PUR and Polysafe Arena PUR safety flooring ranges which offer sustainable slip resistance in accordance with HSE guidelines were installed by flooring contractors CS Flooring Solutions at Pontypridd's new visitor attraction.

**Space:**  
Community Pool

Suitable for busy commercial environments where there is a high level of footfall, Polysafe Arena PUR in the cement design was installed in The Waterside cafe and the visitor centre where the lido's rich heritage is showcased, whilst Polysafe Modena PUR safety flooring in the Blue Quartz and Andesite shades was used in back of house zones and the centre's busy reception area.

Both of these design-led safety flooring ranges incorporate clear aluminum oxide safety particles through the performance layer of the vinyl which are virtually invisible to the naked eye, ensuring an attractive yet safe floor finish for use in commercial or residential areas. The Polysafe Arena PUR range replicates on trend-stone, textile and abstract designs whilst the Polysafe Modena PUR collection features a sophisticated micro-granite decoration in a selection of neutral and bright shades.

Amy Griffiths, Assistant Site Manager on the Lido Ponty project comments,

"We are delighted with the finished result at Lido Ponty where the flooring perfectly complements and enhances the new look of the lido. Thanks to the Polysafe Arena and Modena ranges we were able to create a safe and sustainable slip resistant environment for visitors without having to compromise on our creative vision for the interior design."
