

LUXURY VINYL TILE WITH PUR

MAINTENANCE REGIME

INITIAL CONSTRUCTION CLEAN

OR

1 Remove all loose debris.

> Ensure that all traces of adhesive are removed from the surface of the floor covering. > Sweep or vacuum to remove dust and grit.

1000
RPM

2 Damp mop with a neutral detergent.

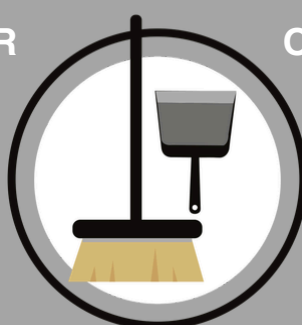

> If required, dry buff with a 1000 rpm plus rotary machine fitted with 3M red or white pads.

DAILY MAINTENANCE

OR

OR

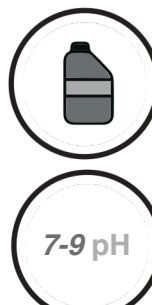

1 Mop, sweep, or vacuum to remove dust and loose dirt.

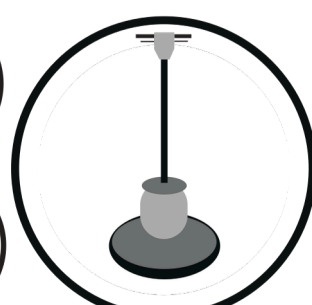

> If required, spot mop to remove stubborn marks, with a neutral cleanser.
> If required, dry buff (1000 rpm) fitted with 3M red or white pads to restore finish.

ROUTINE MAINTENANCE

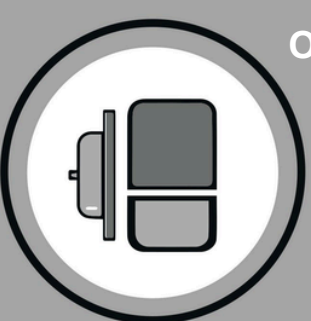

7-9 pH

1 Assess the appearance of the floor.

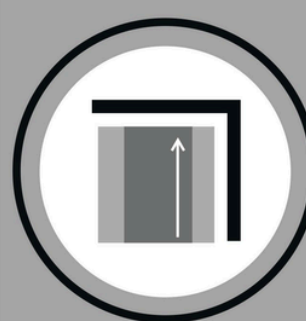

> If required, scrub with a scrubber dryer (165 rpm) fitted with 3M red or green pads, and using neutral cleanser (pH 7 to 9).
> If required, dry buff (1000 rpm) fitted with 3M red or white pads to restore finish.

OR

1 Using an applicator and tray, or a Kentucky mop with a wringer and bucket.

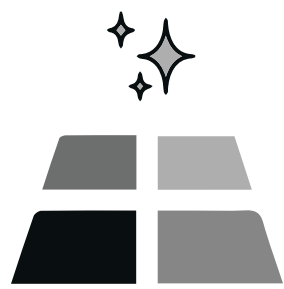

2 The first coat should be applied thinly and evenly to within 200mm of the skirting. > It should then be left to dry for approximately thirty minutes.

2 When the first coat is dry, a second coat should be applied at right angles to the direction of the first.

> Subsequent coats should be applied at right angles, and the final coat should be applied right up to the skirting.
> Two to three thin coats are usually sufficient to provide excellent resistance to abrasion, scuffing and removal of black heel marking.

FLOOR POLISH APPLICATION

ADDITIONAL INFORMATION

> Always follow the Health and Safety guidance provided.
> In order to minimize costs, subsequent polish applications may be applied only to high-traffic areas.
> The cleaners and detergents should be diluted as per the manufacturer's instructions.

If in doubt please contact Polyflor Canada.
