

# STANDARD SMOOTH VINYL WITH PUR

## MAINTENANCE REGIME

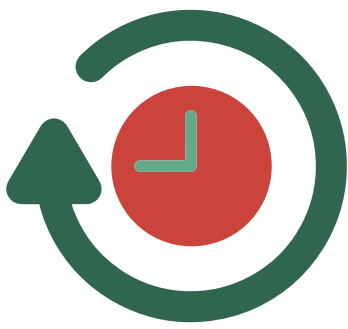

INITIAL CONSTRUCTION CLEAN

**1** Remove all loose debris.  
 > Ensure that all traces of adhesive are removed from the surface of the floor covering.  
 > Sweep or vacuum to remove dust and grit.

OR

**2** Damp mop with a neutral detergent.  
 > If required, dry buff with a 1000 rpm plus rotary machine fitted with a 3M red or white pad.

1000 RPM

ROUTINE MAINTENANCE

**1** Damp mop with a neutral detergent.

**2** > If required, dry buff with a 1000 rpm plus rotary machine fitted with a 3M red or white pad.

1000 RPM

DAILY MAINTENANCE

**1** Mop, sweep or vacuum to remove dust and loose dirt.  
 > If required, spot mop to remove stubborn marks with a neutral cleanser.

OR

WEEKLY MAINTENANCE

**1** Assess the appearance of the floor.  
 > If required, light scuffing - dry buff with a 1000 rpm plus rotary machine fitted with a 3M red or green pad.

OR

> If required, heavier scuffing — spray clean using a floor maintainer and 165 rpm plus rotary machine fitted with a 3M red or white pad.

1000 RPM

165 RPM

PERIODIC MAINTENANCE

**1** Assess the appearance of the floor.  
 > If the floor has dirt buildup, machine scrub with a scrubber dryer (approx. 165 rpm) fitted with a 3M red or white pad, using a neutral or alkaline detergent.

165 RPM

OR

**2** Rinse thoroughly and allow to dry.  
 > Dry buff to restore finish.

ADDITIONAL INFORMATION

> Always follow the Health and Safety guidance provided  
 > The maintenance regime requires the installation of an effective barrier matting system.  
 > Twister pads or any type of abrasive pad containing diamond shreds should only be used on smooth floors as part of a deep set cleaning and never for daily or frequent cleaning purposes.
